

AKSHAT KANSARA

Full-Stack Developer · Node.js · React.js · Next.js · AI Engineering

+91 9328123156 | askansara17@gmail.com | akshat-kansara.vercel.app | linkedin.com/in/akshat-kansara | github.com/Akshat0904

PROFESSIONAL SUMMARY

Full-Stack Developer with 2.5+ years of experience specializing in Node.js, React.js, and Next.js. Expert in building scalable web applications with Node.js and PostgreSQL. Currently expanding into AI Engineering, with foundational skills in integrating LLM APIs and building AI-powered features to enhance user experiences. A results-driven engineer focused on combining robust web architecture with emerging AI technologies.

WORK EXPERIENCE

Software Engineer

July 2023 – Present

Avesta HQ · Ahmedabad, Gujarat

Real Estate Intelligence Platform | React · Node.js · Express.js · PostgreSQL · Mapbox · Google Maps API · NearMap · Elasticsearch · Redis · Matomo

- Architected a high-performance listing engine for a leading Australian real estate platform, implementing advanced Mapbox and Nearmap integrations that deliver sub-second property visualization across a high-traffic, national database.
- Built high-throughput Node.js/Express.js APIs with Elasticsearch and Redis caching, ensuring ultra-low latency under high-traffic concurrency across a large-scale PostgreSQL database.
- Deployed embeddable property widgets across 50+ partner sites, driving a 20% increase in referral traffic; optimized Core Web Vitals to boost SEO rankings and organic reach.
- Built a Broker/Agency management portal enabling real estate agencies to publish and manage property inventories, streamlining the national sales pipeline.
- Integrated Matomo Analytics for privacy-compliant user behaviour tracking, enabling data-driven insights on property search patterns, page engagement, and referral sources across the platform.

AI-Driven HRMS & WhatsApp Rule Engine | Node.js · Express.js · PostgreSQL · Meta WhatsApp Cloud API

- Built an automated discrepancy resolution system integrating Meta WhatsApp Cloud API for a conversational real-time manager-employee interface
- Designed a custom Backend Rule Engine to automatically detect attendance and payroll anomalies from organizational master data.
- Reduced manager-to-employee issue resolution time by over 50%.

Enterprise Industrial IoT Platform | Node.js · Express.js · PostgreSQL · Clean Architecture · TDD

- Architected a mission-critical IoT backend using Clean Architecture and SOLID principles, processing real-time machine telemetry ingestion and trend storage.
- Implemented Unit, Integration, and Component testing strategy achieving 99.9% reliability for industrial monitoring.
- Built a real-time monitoring dashboard with live widgets and an automated alarm system for instant deviation alerts.

Backend Developer Intern

March 2023 – June 2023

Rocker Technologies · Vadodara, Gujarat

- Developed 10+ RESTful APIs using Node.js and Express.js, optimizing data retrieval workflows and reducing backend response latency by 15% for internal service modules.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets, Authentication, JWT

Databases: PostgreSQL, MongoDB, SQL, pgvector

AI Engineering: OpenAI API, LLM APIs, AI-powered feature integration

Architecture & Testing: Clean Architecture, SOLID Principles, TDD, Unit Testing, Integration Testing

Cloud: AWS S3, AWS EC2, AWS Lambda, AWS AMI, AWS IAM

Tools & Platforms: Git, Docker, Vercel, Figma, Postman

Integrations: Mapbox, Google Maps API, Meta WhatsApp Cloud API, Matomo Analytics

PROJECTS & ACHIEVEMENTS

Hackathon Runner-Up: Digital Kudos Wall **Avesta HQ**

2025

- Built a role-based employee recognition app using BMAD methodology, AI-assisted development (Cursor IDE), and Clean Architecture with TDD across frontend, backend, and database layers.

EDUCATION

Bachelor of Electronics & Communication Engineering

08/2019 – 06/2023

Vishwakarma Government Engineering College · GPA: 7.83 CGPA
